CONTINUING EDUCATION WORKSHOP

Friday, March 15, 2013 in the Western Manitoba Regional Library
710 Rosser Avenue, Brandon, MB

PROGRAM

9:30 – 10:00   **Registration**

10:00 – 11:45   **Introduction to RDA**

This session will give a broad overview of the new standard as well as helpful illustrations of where it differs from AACR2. It is intended for public service staff who need to be able to understand the catalogue and make basic changes to records.

Presenter: **Les Moor** *is Head of Technical Services at the University of Manitoba Libraries, where he oversees acquisitions, cataloguing, and electronic resource licensing and access for the University's two campuses and six hospital libraries. Previously he taught cataloguing at the University of Toronto's Faculty of Information, and he was the Assistant Manager and head of cataloguing of OCLC's Winnipeg contract cataloguing division.*

12:00 – 1:45   **Lunch and a Tour of the New ACC Campus**

Overlooking the scenic Assiniboine River valley, Assiniboine Community College's growing North Hill Campus is a heritage site with two of three building phases completed to date. Attendees will have lunch in the Manitoba Institute of Culinary Arts. The tour will then cross the picturesque grounds to the Len Evans Centre for Trades and Technology, a $45 million structure in which trades and apprenticeship programs enjoy both modern machine shops and historical preservation. The stately Parkland Building, which will be home to the third and final phase of the college's relocation including the library, will be the last stop on the tour.

The cost for lunch is $10 and participants must pre-register. Those who do not wish to attend are invited to explore Brandon's diverse downtown restaurant scene.

2:00 – 3:45   **Technology Strategies**

Cloud Computing Demystified

When something new comes along everyone wants to know what it is and what it will mean in our professional and personal lives. Join Carol for an exploration of "cloud computing" and how it is impacting libraries and individuals now and in the future.

Googling the Good Stuff

Let's face it, libraries are rarely the public's first choice when looking for information. "Just Google it" has become a phrase we're all too familiar with. How do we compete with that? Instead of trying to compete, let's embrace it and show our patrons how to use Google to it's fullest! This session will set you on the path to becoming a Google master.

Presenter: **Carol Cooke** *is the Health Sciences Centre Librarian/Health Sciences Libraries Web Services Librarian with the University of Manitoba. She is responsible for coordinating the creation and maintenance of the Library's website; developing specialized local databases; and providing reference services and training for faculty, staff and students at the Bannatyne Campus and HSC. Despite being terrified of public speaking early on in her career, one of the things she likes best these days is talking with people about technology and it's effect on libraries and our lives.*

4:00 – 5:00   **Author Reading**

Award winning teen and juvenile author Anita Daher's presentations are always dynamic, informative and fun. Whether you are in a school or public library, have kids at home or just love the genre, you'll have a great time with Anita. Come and discover your next favourite author!
